University Records—Retention and Disposition

RECORDS MANAGEMENT Departments are responsible for retaining and disposing of University records in accordance with retention periods approved by the Washington State Records Committee. (RCW 40.14)

Procedures, Records, and Forms The Office of Procedures, Records, and Forms coordinates the records management program and assists departments with records retention and disposition. The Director of Procedures, Records, and Forms is the WSU Records Officer.

Archives The University Archivist serves as a resource to identify records that may be suitable for the WSU archives collection (BPPM 90.02).

State Records Committee The State Records Committee reviews and approves University Records Retention Schedules. The committee includes a representative from the State Auditor's Office, the Office of Financial Management, the State Archivist, and the Office of the Attorney General.

Definition of Records All records and copies of records made or received in the conduct of WSU business, regardless of physical form or characteristics, are considered public records for purposes of retention and disposition. (RCW 40.14.010)

RETENTION SCHEDULE An approved Records Retention Schedule specifies retention periods for public records and authorizes destruction or release to the University Archives. Records series titles held commonly by multiple departments are included in the All-University Records Retention Schedule. Records series titles held by one department only are included on a department schedule.

All-University Schedule The retentions of most University records are included on the All-University Retention Schedule (BPPM 90.01). Listed retentions supersede retentions listed on all previously issued schedules for the indicated record series titles.

If, after review of departmental records, departmental personnel find that all records are included in the All-University Records Retention Schedule, no further action is required by the department. The department retains and disposes of records in conformance with the All-University Schedule.

Department Schedule If the department has unique records series titles not included on the All-University Schedule, the department’s records coordinator is to contact the WSU Records Officer. The Records Officer prepares a draft Record Retention Schedule that includes the unique records series titles and recommended retentions.
University Records—Retention and Disposition

Department Schedule (cont.)

The Records Officer routes the draft schedule to the department for review.

After departmental review and approval, the Records Officer routes the final Records Retention Schedule to the State Records Committee for approval.

To request a new or revised Retention Schedule, contact the Records Officer at telephone 509-335-2005 or mail code 1225.

Schedule Description

The following description includes terms used on the All-University Schedule and individual departmental Retention Schedules. The exhibit in Figure 1 is of a departmental schedule.

<table>

Figure 1

Office Name

The Office Name is the department or unit name.

Records Coordinator

The department chair designates a Records Coordinator for the department. This employee coordinates the preparation of the Records Retention Schedule, reviews the schedule biennially and supervises retention and disposition of office records.

Records Series Title and Description

The Records Series Title--Function/Purpose or Title/Description statement names and describes the records in a records series.

University Records—Retention and Disposition

Status

The checkboxes in the Status field indicate whether or not the records series is:

- New to the departmental schedule.
- Revised.
- Discontinued.
- Transferred or to another University department.

If no checkbox is selected, no change is made to the records series.

OPR or OFM

OPR

OPR (Official Public Records) include:

- Records required by state or federal law.
- Records of legal transactions, e.g., receipts, contracts.
- Records used in fiscal/financial audits, e.g., Effort Certification.

OFM

OFM (Office Files and Memoranda) include all other records including copies of Official Public Records. Most records are OFM.

Location of Other Copies

This column identifies the location of other copies of the records series. An asterisk (*) identifies the office holding the official record for the University for that records series. This column may be blank.

The term "Department" indicates that the records series is held in multiple University department locations.

Retention and Disposition Action

The Retention and Disposition Action is the minimum period that the records must be kept after a specified cutoff event and the action to be taken at the end of this period. Administrators may keep records longer.

The disposition portion of the statement indicates whether the records are to be destroyed at the end of the retention period or sent to University Archives for appraisal and selective retention. (See Archival Records.)

Example

If the retention and disposition action for a records series is "Retain for 2 years after end of fiscal year, then destroy," the records must be collected through the end of the current fiscal year and retained for at least two more fiscal years before destruction.
University Records—Retention and Disposition

Secondary or Reference Copy

Some records series specify minimum retention periods for secondary or reference copies. NOTE: If no minimum retention of secondary/reference copies is specified for a records series, secondary or reference copies are held until the administrative purpose is served and then destroyed.

Disposition Authority Number

The State Records Committee assigns a Disposition Authority Number (DAN) when a records series is approved for retention and disposition.

Remarks

Archival Records

If the University Archivist determines that a records series may have long-term historical value, the Records Officer indicates "Archival (appraisal required)" in the Remarks column. Records coordinators are to arrange to transfer such records to University Archives after the retention period has elapsed. Contact Manuscripts, Archives, and Special Collections (MASC) for assistance; telephone 509-335-6691 (see also BPPM 90.02).

Essential Records

University departments are responsible for identifying and protecting essential records needed during an emergency and for the reestablishment of normal operations afterwards. If a record series is identified by a department as being required for the department to resume operations after a disaster or emergency, "essential" is indicated in this column. If lost or destroyed, recreation of essential records can be both costly and time consuming, if not impossible. Refer to BPPM 90.15 for the complete essential records policy.

Biennial Review Process

Each University department is responsible for reviewing the departmental Records Retention Schedule at least once every two years to ensure that the schedule is complete and current (WAC 434-626-020). To facilitate this review process, Procedures, Records, and Forms biennially notifies the department of review requirement.

The department records coordinator reviews the schedule with appropriate departmental officials. The department responds to Procedures, Records, and Forms by electronic mail or completes and mails a Retention Schedule Review form to Procedures, Records, and Forms at mail code 1225. If changes are required, the Records Officer prepares a draft schedule as indicated under Retention Schedule.

RETENTION FACTORS

The department is responsible for securely maintaining the records for the retention period indicated on the retention schedule.
University Records—Retention and Disposition

Safety/Confidentiality

The department's responsibility includes ensuring the physical safety of the records, as well as ensuring that confidential records are protected from inappropriate or illegal release. See BPPM 90.05 for more information about release of confidential records.

Electronic Records

Electronic records must be retained in electronic format and remain usable, searchable, retrievable, and authentic for the designated retention period. Printing and retaining a hard copy is not a substitute for retention of the electronic version. (WAC 434-662-040)

Permanent Retention

Few records are worth preserving forever. The Records Committee rarely approves retaining a records series permanently.

Superseding Retention Schedule

If an audit, legal action, or public records request is in progress, related records may not be disposed of even when authorized by the retention schedule. See BPPM 30.12 and 30.14 regarding audits; BPPM 90.05 regarding public records requests; and BPPM 90.12 regarding litigation holds.

Inactive Records Storage

After records are no longer regularly accessed, departments should move the records from active files in file cabinets or computers to inactive storage locations.

For inactive storage, paper records may be placed in archive boxes. Archive boxes are acid-free, double-walled storage boxes with built-in handles, and may be obtained from most office supply vendors.

Digital records may be moved to offline storage.

An inactive storage location should be secure from unauthorized access, as well as provide protection from physical damage, e.g., from vandalism, water, fire.

Space

WSU Pullman

At WSU Pullman, if acceptable space is not available to store inactive records for the required retention period, route a written request for storage space to Space Management in Facilities Services, Capital; mail code 3611; telephone 509-335-8456. For further information, see:

facilitiesservices.wsu.edu/space_request.aspx
University Records—Retention and Disposition

Regional Campuses
At the following regional campus locations, route requests for inactive records storage space to the campus facilities services unit:

- WSU Spokane: 509-358-7994
- WSU Tri-Cities: 509-372-7253
- WSU Vancouver: 360-546-9000

RECORDS DISPOSITION
An approved records schedule provides authorization to archive or to dispose of University records. (RCW 40.14.060)

After records have been stored for the complete retention period, the records coordinator either sends the records to University Archives or disposes of the records. If the records are to be disposed of, the records coordinator either destroys or recycles the records.

Recycling
Many records may be recycled in accordance with University recycling procedures (BPPM 80.80).

Confidential Records
If the records are confidential, departments are responsible for ensuring that the records are protected from unauthorized or illegal disclosure by reducing them to an illegible condition. (WAC 434-640-020)

Definition
Confidential records include records that are exempt from public disclosure (see BPPM 90.05, 90.06, and 90.07). Examples of confidential records include student files and patient files.

Paper Records Destruction
Generally, paper records are destroyed by shredding. Departments may shred records with a departmentally-owned shredder, hire a private shredding company, or have the records shredded by WSU Waste Management.

Facilities Services, Operations Shredder
The Waste Management division of Facilities Services, Operations at WSU Pullman operates a shredder and accepts confidential paper records for shredding. Contact Waste Management for information regarding use of the shredder and costs to departments; telephone 509-335-4530.

Private Shredding Company
Departments may obtain the services of a private shredding company. Contact Procedures, Records, and Forms for more information. Departmental personnel contact the private shredder and pay for the service by purchasing card (BPPM 70.08) or by issuing a Department Order (BPPM 70.07).
University Records—Retention and Disposition

Nonpaper Records

Like paper records, confidential records in nonpaper media, e.g., microfilm, CDs, DVDs, hard drives, must be made illegible prior to disposal.

Such media must be physically destroyed or digital records must be securely deleted with a suitable software program. Any electronic destruction method must include at least a three-pass binary overwrite. Contact Procedures, Records, and Forms for assistance with locating deletion software.

Surplus Computers

See BPPM 20.76 for procedures for removing data from hard drives of computers to be sent to Surplus Stores or sold to another University department.

All-University Retention Schedules

- Administrative—Executive Level Records (Dean and above)
- Administrative—General Office Operations
- Accounting/Fiscal Records
- Information Services Records
- Legal Files
- Library Services Records
- Mail Services Records
- Payroll and Personnel Records
- Property Management Records
- Public Affairs and Public Disclosure Records
- Purchasing Records
- Records Management Files
- Research and Sponsored Projects Records
- Safety Records
- Security Records
- Student Records
- Travel Records
